

Sacred Love

Sit down by my side
Be quiet, close your eyes and listen
To the spirits in the sky

Burden of the day
Slowly slips away
Get ready to get in vibe with the divine

Concentrate your mind
To the power inside
Pulsating stronger until you can sit still no longer

Let's get electrified
You can't resist, you can't deny
The beat that makes your booty move
The godgiven songs

Sacred love - Souls on fire
Sacred love - Gets me higher
Sacred love - My desire
Sacred love - Sacred love

There ain't no mood you can't improve
By listening to a fitting groove
Whatever they can do to you
They can't take away your music

There ain't no race that you can't run
By following the beating drums
The magic of godgiven songs
Now you should use it !

There ain't no goal you can't achieve
No destination you can't reach
No woman you can't soften
moving your hips and feet

noone you can't keep from evil plans
Involving him in a little dance
No more efficacious medicine
No better tool to spread the peace

Sacred love - Souls on fire
Sacred love - Gets me higher
Sacred love - My desire
Sacred love - Sacred love
